THE FUTURE OF DIVING STARTS WITH YOU.

HUMAN FACTOR DIVING™

Your gear should adapt to you, allowing you to personalise every aspect of your dive. This is the guiding philosophy of every SCUBAPRO innovation. Human Factor Diving™ keeps you at the center of the experience, before, during and after your dive—with gear that's intuitive, comfortable and perfectly suited so all you have to focus on is having an incredible dive experience.

INSIGHT

There's no one-size-fits-all approach to creating gear that works around you. With patented features that no other company offers, SCUBAPRO is always improving our gear, taking diver feedback into the development process and making it better and smarter. It's an ongoing conversation about your needs and how you're using the products to make your dive unforgettable.

EVALUATION

Designed by divers for divers—each new product is thoroughly tested in real dives to prove its usability, long before it ever hits the shelves. Our equipment is tested with more rigor than any certification agency requires, so once it's finally released to the public, you know it will live up to the SCUBAPRO name. A name that's trusted by militaries, public safety and specialised diving research organisations around the world.

PERSONALISATION

Gear developed with the Human Factor Diving™ approach is so smart and intuitive, our divers only need to focus on one thing: exploration. We work proactively to solve common issues most divers face, in order to make diving a better, more enriching experience. That's because, for SCUBAPRO, the effort to continually innovate more adaptive gear is never over.

HUMAN FACTOR DIVING™

SCUBAPRO leads in every category with gear that's intuitive, comfortable and leaves you free to explore.

REGULATORS

Adapted to your breathing style, size and type of diving.

COMPUTERS

Personalised dive profiles are created using your own biometric measurements.

BCD's

Unmatched fit and function, allowing you to take control of your buoyancy.

SUITS

Body Mapped to ensure outstanding warmth, comfort and fit.

TAKE IT ALL IN.

Discover the peace of exploring the water, hearing only the beat of your heart and the relaxed rhythm of each breath. With SCUBAPRO regulator systems, you can do what comes naturally, and leave the ordinary behind. Trust the most advanced technologies to give you a truly incredible experience.

THE UNDISPUTED LEADER IN REGULATORS.

When it comes to SCUBAPRO regulators, divers have many choices, including piston and diaphragm designs, user adjustments and convenience features available nowhere else. But a regulator must, first and foremost, deliver smooth and effortless airflow in all dive conditions, at all depths, with unquestioned reliability. And that's where SCUBAPRO truly shines.

Constructed from the best materials available, such as titanium and carbon fibre

Pre-dive/ dive switch reduces free flow

LEADING SECOND STAGES

Configurable port routing to dive however you choose

ADVANCED FIRST STAGES

Extended Thermal Insulating System (XTIS) available in EVO first stages. XTIS fully insulates the inner mechanical components for extra protection.

Constantly EVOLving performance

Extremely comfortable mouth pieces and ergonomically shaped second stages

Adjustable Venturi personalisation lets you easily adjust airflow during the dive

A PROVEN LEGACY.

Why do so many militaries and public safety teams buy SCUBAPRO? Because they require equipment that can meet their stringent standards, that can endure rugged use and that can always be relied upon to work when needed. When you buy SCUBAPRO, you're in good company. These models consistently outshine the competition in independent regulator tests, delivering low-effort airflow regardless of diving depth or breathing rate.

A REGULATOR FOR EVERY DIVE.

SCUBAPRO draws from its great variety of regulators to create ideal systems for any diving: casual recreational, travel, cold-water, deep or technical.

- Two air-balanced flow-through piston first stages.
- Two air-balanced diaphragm first stages.
- One classic downstream piston first stage.
- Four second stages with air-balanced valve technology.
- One second stage built with Optimal Flow Design.
- One second stage built with classic downstream valve technology.

All that's left is to pick the perfect system for your goals and diving style.

BUILT AND TESTED TO BE THE BEST.

Each SCUBAPRO regulator prototype is designed, engineered, and tested before being put into production. Sophisticated ANSTI breathing machine tests that monitor regulator performance in simulated diving situations are followed by rigorous pool testing and ocean testing in worldwide locations. Only after a prototype successfully completes this rigid testing process is it deemed ready to go into production. To date, more than three million regulators have been produced in SCUBAPRO's factory in Italy.

HUMAN FACTOR DIVING™

Wide variety of combinations
Allow you to build the perfect system for you and your dive needs

The ultimate configuration and breathability
With downstream and balanced second stages in a variety of models

Swivels, breathing adjustments and configurations
To ensure diver comfort

Effortless airflow
In all dive conditions, at all depths, with unquestioned reliability

A700

The exceptional A700 second stage, teamed with a perfectly matched MK25 EVO or the new MK17 EVO first stage, forms the ultimate high airflow system for all diving needs. SCUBAPRO sets the standard for second stage regulator performance with the A700. Integrating air-balanced valve technology, the A700 brings you extraordinary breathing performance in a striking, precision-handcrafted, full-metal package – or in a lighter carbon fibre cover. Whatever your dive destination, the SCUBAPRO A700 lets you breathe effortlessly and naturally underwater with an unbeatable WOB of 0.49 J/L for a lifetime of exceptional dive experiences.

MK25 EVO/A700 CARBON BLACK TECH new

A lightweight yet virtually indestructible carbon fibre front cover plus a durable Black Tech coating deliver excellent protection while offering superb breathing performance for technical diving and more.
DIN & INT.

MK25 EVO/A700

This always-impressive system can be counted on for steady, effortless airflow and exceptional cold-water protection with its patented Extended Thermal Insulating System [XTIS] technology.
DIN & INT.

INTRODUCING THE MK17 EVO

- NEW STREAMLINED DESIGN
- ENVIRONMENTALLY SEALED
- INCREASED AIRFLOW
- REROUTED PORTS

MK17 EVO/A700 new

More compact yet delivering better performance than its predecessor, the new MK17 EVO is perfectly paired with the A700. Built for demanding dive conditions, you can always be confident of your next breath.
DIN & INT.

A700 new CARBON BLACK TECH

Up the Intensity
Pair A700 Carbon Black Tech with the new Mantis Black Tech.

SCUBAPRO's A700s are legendary. The latest A700 lives up to its own reputation and now features a carbon fibre cover that's virtually bulletproof. Upgrade to the world's most incredible second stage that's now even lighter and more compact than ever.

DLC Black Tech Finish

The same coating trusted by the world's premier auto racers. This finish doesn't just look intense; it shields your premium second stage from corrosion and scratches, leaving it shining dive after dive.

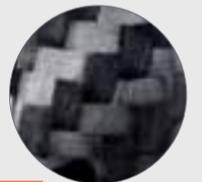

MK25 EVO BT First Stage

Superb Breathing Performance

Breathe more easily than ever, thanks to a sectional exhaust tee, large diaphragm and air balanced valve.

- **Sectional Exhaust Tee**—Operates in tandem with an oversized exhaust valve for easy exhalation.
- **Large Diaphragm**—Increases breathing sensitivity to another level.
- **Air Balanced Valve**—Smooths inhalation effort when diving at varying depths and supply pressures.

new Carbon Fibre Cover

Hand-assembled with the highest-grade carbon fibre on the market. It makes the new A700 much lighter, increasing comfort and reducing mouth strain.

S600

The MK25 EVO/S600 regulator has become synonymous with SCUBAPRO quality and unbeatable engineering. It combines the best-selling air-balanced second stage with the top-performing air-balanced piston first stage for flawless performance and ease of breathing. SCUBAPRO offers three different models, each with its own specific features and benefits. The Titanium is especially designed for ultra-lightweight portability and the Deep Blue model delivers scratch- and corrosion-resistant protection. All models offer instant and constant delivery of ultra-high airflow for incomparable performance in all conditions.

G260

The G260 is a balanced, adjustable second stage featuring metal components for excellent cold-water resistance [inlet tube, orifice, inhalation control knob and hose connector]. Its high performance makes it a choice for all demanding divers and it will be the natural choice for G250 fans. The left-right hose attachment option makes it ideally suited for tech diving configurations. Available in a Black Tech version featuring a durable DLC [Diamond-Like Carbon] finish that protects against salt water and corrosion.

MK25 EVO/S600 TITANIUM new

Our top technology in an ultra-lightweight, corrosion-resistant package – great for travel. The first stage is machined from a solid block of titanium with Extended Thermal Insulating System [XTIS] cold-water protection; the second stage boasts a titanium interior barrel. DIN & INT.

MK25 EVO/S600 DEEP BLUE TITANIUM CORE new

SCUBAPRO's top regulator technology is paired with a MK25 EVO Deep Blue first stage this year. Our Deep Blue PVD finish ensures high scratch and corrosion resistance. Combined with an interior titanium barrel second stage for lightweight performance. DIN & INT.

MK25 EVO/G260 BLACK TECH new

Aimed at technical divers, this system offers excellent resistance to freezing and effortless air delivery. A sleek Black Tech scratch-resistant coating protects both first and second stages. DIN & INT.

unterwasser
**test
winner**
04/2015
Cold Water
Regulator

MK25 EVO/G260

Aimed at technical divers, this system can face any dive situation—including extreme cold water conditions— with rock solid performance and outstanding reliability. DIN & INT.

MK25 EVO/S600

Flawless performance and ease of breathing are the essence of this system. The preferred combo of professionals or any diver embarking on long, deep dives that require ultra-high performing cold-water protection. DIN & INT.

MK17 EVO/S600 new

Teaming SCUBAPRO's best-selling second stage with its newest environmentally sealed first stage creates a reliable air delivery system for all diving conditions. DIN & INT.

Cap with 5 LP-Ports

MK21/G260

A regulator combination with a compact, air-balanced piston first stage and optional cap for versatile routing options. The standard cap [+/- 20° routing] can be replaced with an optional cap, which has 4-hose low-pressure routing configurations [0°/30°] and a 5th central High Flow LP port. DIN & INT.

MK17 EVO/G260 new

The ideal system for tech divers and cave explorers. New environmentally sealed first stage is designed for cold waters and less-than-pristine dive conditions. DIN & INT.

For special customer design use safari front cover.

C350

The innovative OFD valve reduces the air flow resistance, delivering an impressive work of breathing effort in comparison to the downstream valve. As the air flow is directed around and not through the spring any air resistance is eliminated resulting in an optimal air flow. The lever fixation is located in the poppet centre, offering the ideal technology for cold water diving. Further more the poppet stroke is up to 3.5mm and guarantees the optimal air flow. The shape of the diaphragm was designed to fit the high airflow due the poppet's stroke. The result is a perfect venturi effect.

MK21/C350 new

SCUBAPRO's smallest second stage teams with the compact MK21 to create a high performance breather that's just the right size for easy dive travelling. The standard cap [+/- 20° routing] can be replaced with an optional cap, which has 4-hose low-pressure routing configurations [0°/30°] and a 5th central High Flow LP port. DIN & INT.

MK17 EVO/C350 new

Balanced sealed diaphragm first stage perfect for cold water diving, paired with a powerflow downstream valve second stage with swivel. DIN & INT.

C350 WITH SWIVEL

MK11/C350 new

The compact C350 is lightweight, breathes easy, offers full user controls and delivers effortless airflow. DIN & INT.

MK11/S360

Fully pre-tuned and easy to use; an affordable yet well-breathing system for recreational divers. DIN & INT.

ALL SCUBAPRO REGULATORS EXCEED THE NEW EUROPEAN TEST NORM EN250-2014 STANDARDS!

Due to the high quality of our regulators we have extended the service interval to 2 years or 100 dives (whichever comes first).

MK17 EVO/R195

A simple and robust construction which offers the utmost in reliability. Perfect for travelling. Also ideal for deco tanks thanks to its reversible hose attachment. With newest environmentally sealed first stage! DIN & INT.

MK11/R195

An extremely reliable and durable system with "all rounder" capabilities in temperate and warm waters. Ideal for beginners travelling to various diving locations. DIN & INT.

MK2 EVO/R195

Featuring a totally evolved classic downstream piston first stage, this workhorse reg delivers impressive breathing sensitivity with steady airflow, plus offers excellent cold-water resistance. DIN & INT.

R195 OCTOPUS

Combines the features of the R195 with a high-visibility yellow cover and a 1 meter yellow hose for easy sharing.

R095 OCTOPUS

The features of the R095 is signal colour yellow and a one-meter-long yellow hose.

MK25 EVO/S560 NITROX

A dedicated Nitrox system combining the top-performing first stage with a balanced S560 second stage. DIN only.

MK2 EVO/R195 NITROX new

For simplicity and top reliability, it has been developed in compliance with the most stringent safety norms. DIN only.

R195 OCTOPUS NITROX

Dedicated nitrox octopus.

INTELLIGENCE AT HAND.

Every diver feels more confident with the advanced features of SCUBAPRO computers and instruments—combining patented, groundbreaking biometric technology, intuitive operation and Human Factor Diving™. Whether you're new to the sport or a long time diver, there's a SCUBAPRO computer to make every adventure better.

INTELLIGENCE THAT SETS THE STANDARD.

SCUBAPRO has been revolutionising dive computers since day one. Pioneering oil-filled devices, air integration and heart rate monitoring was just the beginning. Divers turn to SCUBAPRO for exclusive technology, reliable performance and unmatched selection.

Scuba, Freediving, Gauge, and CCR modes

Diving profiles based on your biometrics

Easy to use, intuitive menus designed by dive and usability experts

Configurable displays allow you to see as much information as you want

Consistent, adaptive algorithms maximise safety and dive time

PATENTED TECHNOLOGY AVAILABLE NOWHERE ELSE.

Only SCUBAPRO offers computers developed with the Human Factor Diving™ approach. Divers have the power to see their own biology analysed and applied to their dive profile—in real time—for a completely customised dive profile. You can measure your heart rate, breathing workload, and even skin temperature—a patented feature only available from SCUBAPRO. No other name offers the same level of personalisation.

PROVEN COMMITMENT TO QUALITY.

Before ever reaching your local dealer, SCUBAPRO prototypes must pass rigorous tests performed by divers and independent research labs. There, all components are subjected to relentless trials for usability and performance. It's the only environment tougher than the real world.

A COMPUTER FOR EVERY DIVE.

Stay nimble with an easy-to-operate wristwatch-style computer, or go pro with fully loaded models. The advanced SCUBAPRO technology in every computer enhances your experience, wherever the dive may be.

DON'T JUST MEASURE YOUR BIOLOGY. USE IT.

ADAPTIVE ALGORITHM

Fine-tunes your decompression plan based on your workload as indicated by biometric feedback.

HEART RATE MONITORING

Provides a more complete picture of your workload so you can respond promptly to heightened stress or over-exertion.*

SKIN TEMPERATURE MONITORING new

Available when using the SCUBAPRO HRM belt, this patent-pending feature incorporates another critical biological factor into your adaptive algorithm.**

MICROBUBBLE SETTINGS

Enables the adaptive algorithm to adjust based on your experience level, age and physical conditioning.

PROFILE DEPENDENT INTERMEDIATE STOPS (PDIS)

Calculates an intermediate stop based on how much nitrogen your body has endured, taking into account your current dive, previous dives and breathing mixes.

STROKE COUNTER

Record your distance—in the open water or the pool—to track progress of your fitness goals. Available in swim mode.

CALORIE TRACKER

Another valuable health tracking technology available with LogTRAK software.

TRACK YOUR PROGRESS

Data gathered through your self-tracking computers can be downloaded for analysis using LogTRAK software, available for PC, Mac and as an Android app.

HUMAN FACTOR DIVING™

Extensive choices for every diver

Differing modes [CCR, Multi-Gas and Gauge] allow recreational and technical divers to utilise the same computer

Advanced technology

Including heart rate and skin temperature monitoring, CCR and Swim modes, Trimix algorithms and personalisation options

Versatile features

Made for the waterman, not just the diver—with modes like Sport, Freediving and Swim, plus calorie counting [when using LogTRAK]

Configurable displays

To make the computer your own for easier operation

*Available with the Galileo and Mantis series. Diver must be wearing SCUBAPRO Heart Rate Monitoring Belt or Polar Belt.

**Available with the Mantis series. Diver must be wearing SCUBAPRO Heart Rate Monitoring Belt.

MANTIS

KEY FEATURES

- Scuba, Gauge, Freediving and CCR dive modes
- Fixed PP02 CCR algorithm for closed circuit rebreather diving
- Predictive Multi-Gas algorithm for nitrox diving
- Chronograph with lap memory
- Swim mode that memorises swim time and strokes [converts to distance]
- Heart rate monitor with optional SCUBAPRO HRM belt
- Marine-grade 316L stainless steel casing and two-toned brushed finish
- Hoseless gas integration gives tank pressure and true remaining bottom time [M2 only]
- Digital tilt-compensated onboard compass allows for easy navigation under water or on the surface [M2 only]
- LogTRAK software available for PC/Mac and Android
- Maximum depth rate: 120m

MANTIS 1 (M1)

A precision blend of sophisticated computer and beautiful timepiece, the M1 is designed for divers who crave the cutting-edge technology of the M2 but don't need air integration or an on-board digital compass. Incorporating SCUBAPRO's Human Factor Diving™, the M1 provides detailed personalised data through the use of biometrics. Offering just the right balance of topside features and underwater functions, you can count on the M1 for industrial-strength reliability that lasts.

SHOWN WITH OPTIONAL COLOUR BANDS

MANTIS 1 BLACK new

Black Tech version. PVD [Physical Vapor Deposition] scratch-resistant coating and a stealth finish.

M2 (MANTIS 2) new

The M2 is a dive computer like no other. Developed using SCUBAPRO's Human Factor Diving™ approach to product design, the M2 offers everything you expect from the leader in diving equipment. Its stylish, brushed stainless steel casing is loaded with topside features and advanced underwater functions, including air integration and electronic navigation. But most importantly, the M2 incorporates cutting-edge biometrics that enable you to live your life in dive mode.

M2 CRADLE new

LED SMART TRANSMITTER new

SCUBAPRO HEART RATE BELT

Monitors both heart rate and skin temp and allows computer to include diver's physiology in decompression calculations.

M2 new (MANTIS 2)

Evolution of the breakout Mantis computer. Created for divers who demand air integration, the most comprehensive biometric monitoring and sleek, stainless steel design. Featuring the same algorithm as the Galileo computer, the M2 makes for a perfect primary or secondary computer option. Experience the latest Human Factor Diving™ innovation that allows divers to feel more liberated than ever.

Real Time Air Integration

Blinking, coloured light of the Smart Transmitter informs you of your tank pressure. No high-pressure hose necessary.

Easy to Read and Use

Exclusive, extra-sharp characters and intuitive four-button menu make M2 easy to read and use.

Versatility Above and Below

Take advantage of the SCUBA, Freediving, Gauge and CCR modes, plus Swim and Sport modes for topside use.

Swiss Engineering and Style

Smart computing and comprehensive features, all packed into a stunning piece of Swiss engineering and design.

Biometric Monitoring

Partner M2 with the exclusive SCUBAPRO Heart Rate Monitoring Belt to incorporate your heart rate and skin temperature into the computer's decompression calculation. The result is a personalised dive profile that increases your safety—and maximises your diving experience.

GALILEO

KEY FEATURES

- Extra-large dot matrix display
- Four-second sampling rate
- Hoseless gas integration
- Continuously updated average depth display
- Exclusive integrated heart rate monitor [optional on Luna]
- Full-tilt digital compass • Personalisation options
- Trimix Algorithm [optional download]
- Predictive Multi-Gas [optional on Luna]

COMPLETE

GALILEO SOL

The ultimate dive computer, Sol contains all core SCUBAPRO features in addition to all technology exclusive to the Galileo series. This state-of-the-art computer accounts for the effect of increased workload on human physiology with features like the integrated heart rate monitor which tailors decompression calculations to your dive.

GALILEO LUNA

The Galileo Luna is everything you need for an extraordinary underwater experience. Luna contains all core SCUBAPRO technology and all features of the Sol except two, which can be added as optional upgrades later [heart rate monitor and Predictive Multi-Gas].

LED & SMART+ TRANSMITTER new

Convenient and safe, a SCUBAPRO transmitter allows you to read tank pressure and true remaining bottom time (RBT) on the computer screen. It needs only to be paired once, the first time you use it. Coded transmission technology prevents interference between different dive computers. The latest LED version lets you know if your tank has gas without needing to activate the computer. Compatible with Galileo Sol, Galileo Luna and Mantis M2 personal dive computers.

CHROMIS

KEY FEATURES

- Extra-sharp characters inspired by Samurai katanas—and developed exclusively for Chromis—are proven to be exceptionally readable underwater
- Patented stroke counter keeps track of strokes from the wrist or fin kicks from the ankle, while also calculating distance
- PC/MAC interface with USB interface cradle accessory
- Continuously updated average depth display in gauge mode which can be reset by the diver at any time
- Independent stopwatch under water in scuba and gauge modes
- Maximum depth rate: 120m

FULL BLACK

CHROMIS new colours

A loaded wrist computer, Chromis is ready for your next adventure, in or out of the water. Divers will enjoy the large, easy-to-read display and a host of features, including a full-featured dive computer, freediving and gauge modes, timepiece and patented stroke counter. Chromis has all the core SCUBAPRO features except for PMG.

Enjoy the Chromis in a colour that celebrates your diving style.

CHROMIS CRADLE

BLACK

DEEP BLUE

LIME GREEN

ORANGE

ALADIN

Aladin dive computers provide discerning divers of all skill levels with a range of computing choices, in a variety of configurations, to suit virtually any dive scenario. Whether you're an experienced technical diver or a beginning recreational diver, prefer your computer in a wrist-mount or a console, need multi-gas capability or just like to keep it simple, there's an Aladin dive computer for you.

ALADIN TEC 3G new

While targeted primarily to technical divers who need multi-gas and CCR support functions, the 3G is also the perfect dive computer for recreational divers striving to evolve in their sport.

ALADIN SPORT new

Compact and intuitive, the Aladin Sport is an excellent starter computer for new divers and a reliable back-up for any diver. Featuring three dive modes and nitrox capability to 50 percent.

DIGITAL 330M

Electronic data delivery system provides actual and maximum depth, ascent speed, dive time and temperature. Rated to 330m.

3-GAUGE IN-LINE CONSOLES

Pressure and depth gauges with 35-degree-tilt FS-2 or FS-1.5 compass.

PRESSURE GAUGES

Compact instruments reading 0-400 bar.

2-GAUGE COMPACT CONSOLES

Sturdy, ergonomic and compact consoles for depth and pressure or pressure and compass.

FS-1.5 new

FS-2

COMPASSES

FS-1.5 calibrated to the Northern hemisphere or the FS-2 for both hemispheres.

DEPTH GAUGE, WRIST MOUNT

Oil-filled Bourdon tube design in an impact-resistant nylon case.

COMPASS LIGHT

Small module may be inserted behind the diver's compass. This light is activated by water pressure and automatically switches off on the surface. LED emits no magnetic signature, making it perfect for military and professional divers.

C-1 COMPASS

A very compact model for general orientation on recreational dives.

CORE FEATURES

For all SCUBAPRO DIVE Computers

Micro-bubble: Choosing a micro-bubble level between L0-L5 allows you to increase your safety by adapting to a particular environment. This feature allows divers to either take up less nitrogen or off-gas more quickly.

Predictive Multi-Gas (PMG): Lets you enjoy the full benefits of carrying high oxygen concentration mixes in addition to your main breathing gas. The computer calculates the decompression schedule for all possible gas combinations and adapts the calculation accordingly. [Not available on Chromis or Aladin Sport, option on Luna]

Continuous average depth reading: Available in gauge mode and can be reset by the user anytime.

Profile Dependent Intermediate Stops (PDIS): Calculates an intermediate stop based on how much nitrogen uptake your body has endured, taking into account your current dive, previous dives, and breathing mixes. [Not available on Aladin Sport]

Enriched air (Nitrox): 21%-100%. The ppO2 is adjustable between 1 and 1,6 bar.

Gauge mode: Turns off all warnings and alarms [except low battery alerts] and monitors depth, time, and temperature without decompression calculations.

Logbook: Records depth, temperature, and heart rate profiles after the dive and stores the most recent 100 hours of dive information at a 4-second sampling rate, which can be downloaded to a PC.

Freediving mode: A collection of features developed for freedivers, including a faster sampling rate, manual start, specialised alarms and warnings, adjustable water density, and specific logbook. Available as a free upgrade for Galileo Sol and Galileo Luna on SCUBAPRO.com.

Altimeter: Measures altitude and alerts the diver when approaching an altitude incompatible with saturation status after a recent dive. [Not available on Aladin Sport]

Bookmark: Allows you to highlight specific moments with a simple button press.

Active back light: With push-on and push-off function.

Replaceable battery: By user or dealer.

WHY MEASURE YOUR HEART RATE?

Heart rate monitoring continuously calculates decompression schedules more accurately based on workload, so you can adjust your dive accordingly for maximised safety.

HRM booklet available at scubapro.com

*Trimix profiles not supported in current version

FORM MEETS FUNCTION.

Your BCD should be in perfect harmony with you. That's why SCUBAPRO offers the ideal combination of comfortable fit, flexibility and intuitive design. Everything right where you need it. No wasted effort. Adjustments easily made on the fly. See how much more you can explore with the freedom of knowing that you and your gear are working as one.

CONTROL THAT'S SECOND TO NONE.

Any jacket lets you adjust buoyancy. Only SCUBAPRO BCDs, created with Human Factor Diving™ innovation, put you in charge of the dive. Discover the power of having the most personalisation features, superior comfort and premium construction on your side.

COMFORT AT EVERY ANGLE.

SCUBAPRO takes a unique approach to designing BCDs; thinking beyond the water to give you the best experience before, during and after the dive. Accomplishing that goal starts with offering the industry's widest selection of sizes and styles, each tailored for differing body types and diving. Female divers in particular never have to sacrifice style or specialised fit with a SCUBAPRO BC.

BACK-FLOTATION

FRONT-ADJUSTABLE

STABILISING

Once on, easy-adjustment features provide snug comfort that stays put. In the water, ultra-soft design and flexibility allow you to move naturally—so you can spend downtime exploring, not adjusting.

After the dive, SCUBAPRO BCDs dry quickly and pack smart for easy travelling to the next adventure.

MADE TO BECOME YOURS.

SCUBAPRO BCDs include all your favorite options, with many ways to make it your own. Customise your BCDs with accessory kits and mountable knives. Take advantage of a multitude of configuration options on every jacket. Add an Air2 fifth generation to streamline your diving with a secondary air source that breathes like your regulator. However you use it, your SCUBAPRO BCD is made to meet your needs.

BUILT FOR A LIFETIME OF DIVES.

SCUBAPRO BCDs are durable beyond the rigors of typical diving, down to the last detail. Every buckle, zipper, strap, and grommet is tested for real-world durability and long-term use. High-quality fabrics are incorporated throughout the BCDs for additional rip resistance and lasting shape. When divers are ready to upgrade to the highest-quality BCD available, they choose SCUBAPRO—the first choice of instructors around the world.

HUMAN FACTOR DIVING™

The most style options
Including fits for women

Designed for more control
So you can find balance regardless
of orientation

Features offered nowhere else
Such as three dump valves on many
of our BCDs

FRONT ADJUSTABLE

X-BLACK

The X-Black features the exclusive AirFlex system, highlighted by the red bungees, that simplifies buoyancy control and guarantees high stability. With rigid backed weight pockets, redesigned dump valves and updated BPI and elbow. One of our most feature-rich BCDs, the X-Black is also one of the most comfortable, even when fully inflated, thanks to its ergonomic cut.

X-FORCE

X-Force features our pre-formed, wrap-around bladder providing higher buoyancy without squeezing when fully inflated. This design offers superior fit and weight distribution. X-Force is more than a powerhouse of features, making it the preferred choice of passionate and advanced recreational divers. With rigid-backed weight pockets, redesigned dump valves and updated BPI and elbow.

X-ONE Improved

The X-One is an ideal choice for divers looking for a simple and feature-rich BC. Integrated front weight pockets are separate, giving you the option to upgrade later. Either way, you get a high-performing, stable and comfortable BC.

GLIDE-X new

This BCD allows you to experience extremely comfortable diving. The SCUBAPRO-exclusive wrap-around air bladder retains its cradle-like shape even when fully inflated. Fully adjustable, it comes with an integrated weight system and a wide range of exceptional features.

BELLA

Specifically designed and meticulously tailored for the female diver. This high-end, front-adjustable jacket has every detail, including a SCUBAPRO-exclusive wrap-around air bladder that retains its cradle-like shape even when fully inflated. The Bella will allow you to experience the most comfortable diving ever.

EQUATOR

The Equator is extremely comfortable and fully adjustable. It comes with an integrated weight system and a wide range of great features. Its compact and lightweight design make it an ideal front-adjustable BCD for diving close to home or elsewhere.

GO Improved travel friendly

Go dive the world with this true travel BCD. Lightweight, easy-to-pack and extremely comfortable, it includes an integrated weight system, new optional trim pouches and a bevy of other original features, as well as SCUBAPRO quality, style, and spirit of adventure. The large size weighs only 1.9kg.

BACK FLOTATION

SEAHAWK

The Seahawk is a dynamic, comfortable back flotation jacket. It allows excellent freedom of movement, while still providing adequate storage with traditional cargo pockets.

LITEHAWK travel friendly

The Litehawk is the travel version in our back flotation family. With a soft, flexible pack instead of a rigid backpack, it is exceptionally light and rolls to pack tightly. Incorporates many of the great features of our back flotation BCDs in a high-performing, lightweight BC. Size XS/S weighs just 2.6kg.

BCD ACCESSORY KIT

This kit contains three conveniently packaged, essential pieces: a White Tip knife with mounting kit, a Nova 200 dive light and handy retractor.

STABILISING

MASTER Improved

The Master Jacket has been certified as a Combined Buoyancy and Rescue Device thanks to its lift capacity and the "face-up" body position at the surface. It is the stabilising jacket choice of commercial, military, instructors and advanced divers needing intensive use, precise buoyancy control and comfort.

AIR2

This fifth-generation octo/inflator is both versatile and easy to use. As a backup regulator in high-stress situations, the AIR2 breathes like a dream, rivaling some second stage models. It is CE-certified for waters 10-degree Celsius or warmer. The large, flexible purge button provides quick clearing when it counts. Divers can also enjoy pinpoint buoyancy control with the AIR2. Its large inflate and deflate buttons are easy to distinguish, and the device fits comfortably in hand. For reliable performance without dangling hoses, the AIR2 is a standout.

Certified as a regulator.

BPI

The Balanced Power Inflator has a streamlined and ergonomic design. The inflation button is easy to locate and requires little effort. A soft mouthpiece has been added. The corrugated hose features an easy to use SQAP (Safe and Quick Air Pin) lever and a connection between hose and elbow valve.

FASCINATION TECH.

Dive in to a new dimension and experience pure adventure. Our X-TEK line is based on many years of experience and the expertise of SCUBAPRO's engineers. The modular X-TEK systems fit every tech diving philosophy – without sacrificing quality, durability, ease of use or overall diving comfort.

X-TEK SYSTEM

SIDEMOUNT SYSTEM

This easy-to-wear addition is compatible with the current X-TEK line and features a soft Airnet backpack, bungees and hooks for tank support and streamlining, making sidemount diving more convenient and comfortable. Includes stainless steel grommets, D-rings, handles and valves.

KEY FEATURES

- 1000D Cordura outer shell
- Soltane inner bladder
- Ergonomic SCUBAPRO balanced inflator
- Specifically designed for sidemount harness
- Attached crotch strap
- Soft Airnet backpack, bungees, hooks
- Inclusive stainless steel grommets, D-rings, handles

X-TEK PURE TEK

A donut wing BCD available with different lift capacities for single or double tanks.

SINGLE TANK

- X-TEK donut wing [18kg lift capacity] 18kg with X-TEK single tank adapter and two single cinch straps
- PURE TEK harness with stainless steel backplate, inclusive single tank adapter

DOUBLE TANK

- X-TEK donut wing [27kg lift capacity]
- PURE TEK harness with stainless steel backplate

X-TEK FORM TEK

Never before has a heavy, double-twin system been so comfortable to dive with. Available with optional quick-release weight pocket system.

- X-TEK horseshoe wing [27kg lift capacity] and FORM TEK harness with stainless steel backplate.

PRO TEK & EXTREME PRO TEK

With this horseshoe system, you are perfectly equipped for every dive. Double-bladder wing for complete redundancy, stainless steel back plate and extremely durable harness for the highest safety in every situation.

PRO VERSION

- Double bladder
- 27kg lift capacity for twin cylinders and PRO TEK harness

EXTREME PRO VERSION

- Double bladder
- 40kg lift capacity for multiple cylinders and PRO TEK harness

X-TEK FORM TEK

A three-piece harness system with anatomically optimised back padding and shoulder straps that can be adjusted in length and alignment for maximum comfort. Comes with two stainless steel D-rings and four D-rings at the shoulder. The harness can be equipped with an optional quick-release weight system. Available with or without backplate and crotch strap.

X-TEK HORSESHOE TWIN

A double-bladder horseshoe wing with a lift capacity of 27kg or 40kg and a bungee system to minimise drag.

X-TEK PRO TEK

Available with or without stainless steel backplate. With continuous webbing, padded shoulder straps, and two stainless steel D-rings on each side. Includes back plate storage pack to fix a buoy. Available with or without backplate and crotch strap.

X-TEK DONUT

Unprecedented buoyancy control regardless of diving position. Available with 13kg, 18kg, or 27kg lift capacity and for single and double tank load.

X-TEK PURE TEK

Made of secure, continuous webbing which weaves through the stainless steel backplate to provide a custom fit. Comes with stainless steel waist buckle, two shoulder D-rings, one left D-ring on the waist belt and "tri-glide" fasteners. Crotch strap optional. Available with or without backplate and crotch strap.

X-TEK HORSESHOE

A single-bladder horseshoe wing with a lift capacity of 27kg for double tanks. With or without bungee.

ACCESSORIES

X-TEK ALUMINUM BACKPLATE

The perfect travel companion. Maximum stability despite low weight.

X-TEK STAINLESS STEEL BACKPLATE

This backplate features optimised stability. Numerous attachment points are provided for optional storage pack or other accessories.

X-TEK SINGLE TANK ADAPTER

Attaches to stainless steel backplate for single tank dives. Includes two SCUBAPRO Super Cinch straps.

X-TEK BACKPLATE STORAGE PACK

Storage pack attaches to plate for additional space to carry accessories.

Shown with backplate, not included.

X-TEK INFLATOR

Specially designed, optional X-Tek inflator with hose.

SHOULDER PADS

Additional shoulder protection for straps.

X-TEK ACCESSORY POUCH

Optional pouches for the harness waist band. Two inner compartments with internal D-ring to secure accessories. Available in two sizes.

X-TEK COUNTERWEIGHT POCKET

Tank or waist band mounted trim weight pockets for optimal weight distribution and in-water stability. Accommodates 1kg per pocket of lead weight.

SIDEMOUNT WING COVER

This wing cover fits both sidemount aircell sizes and keeps your rig streamlined while increasing durability.

WET NOTES

Pocket-sized notebook with plastic pages and a dedicated pencil.

MARKER BUOY

Safety buoy with valve system, buoy remains inflated. Double fill mechanism, perfect for Tech diving.

CROTCH STRAP

[50mm] width crotch strap attaches to all backplates. Complete with two stainless steel D-rings.

SOFT TRAVEL BACKPLATE

This lightweight, soft backplate was developed for the Form Tek Harness as a substitute for a metal backplate. It comes with two Super Cinch tank bands and is ideal for air travel.

BUOY POUCH

Pouch accommodates surface markers and fits on all X-Tek HS wings. Easy to reach and use in every position. Size adjusts with bungee cord.

REGULATOR NECKLACE

Flexible, long-lasting band for back-up second stage to ensure a secure and quick recovery.

MINI REEL LARGE

With 30 meters of nylon line and a double-ended stainless steel snap.

X-TEK SCREW SETS

Extra bolts to assemble your custom X-Tek setup in the optimal configuration for your personal use. Available in 14mm and 9mm.

QUICK-RELEASE WEIGHT POCKETS

Weight pocket system with quick-release buckle for divers seeking releasable weight pockets for their BCD system.

STAINLESS STEEL SNAPS

Stainless Steel Snaps in AISI 316 for securing accessories and stage tanks. Available in various sizes in both double-end and swivel configurations.

WHEREVER YOU ARE, YOU'RE COVERED.

The commitment to keeping divers more comfortable, longer is in the fabric of every SCUBAPRO suit. It's a difference you can't miss—from the moment you gear up, through the entire dive. No other name offers more premium options that combine unwavering performance with the comfort and style to suit you to a T.

NO COMPROMISING WARMTH, FIT OR STYLE.

SCUBAPRO suits set the standard for comfort, style and thermal protection. Unlike other manufacturers, SCUBAPRO engineers suits with the same attention to detail given to other technical gear, with a continued commitment to innovation. That's why SCUBAPRO suits undergo a constant evolution in materials and construction. Each feature on every SCUBAPRO suit is expertly designed and engineered to keep you protected throughout your entire dive, be it in warm equatorial currents or the frigid seas of the Arctic. Whatever the ocean environment demands, SCUBAPRO suits stylishly deliver.

Neck, wrist, diagonal back and ankle YKK zippers make it easy to get on and off

Strategic, limited panel layouts, that flatter the body and add comfort

Everflex is now 40 percent more flexible

SUPERIOR FIT ALL AROUND.

Through an exclusive process called **Body Mapping**, SCUBAPRO designs a more complete suit around your needs. Careful attention is given to material selection by panel, such as utilising Diamond Span and waterproof neoprene coatings that dry quicker. **Body Mapping** also influences the overall location of panels, seaming and zippers. The result is a suit with maximum stretch, better comfort and durability and the best performance possible.

SCUBAPRO also uses unique, thinner materials engineered to perform better than suits using thicker, more traditional materials. All of this ensures a better fit, meaning more warmth and longer suit life.

SPECIALISED PERFORMANCE FEATURES.

It's the unique details that make a SCUBAPRO suit truly exceptional in comfort and thermal protection.

DIAMOND SPAN LINER: Designed to drain water and dry quickly for added comfort when preparing for repeated dives.

EVERFLEX MATERIAL: A neoprene material produced using X-Foam that is lightweight, flexible and durable.

PROTECTIVE SEALS: Strategically placed to minimise water entry and keep you warmer.

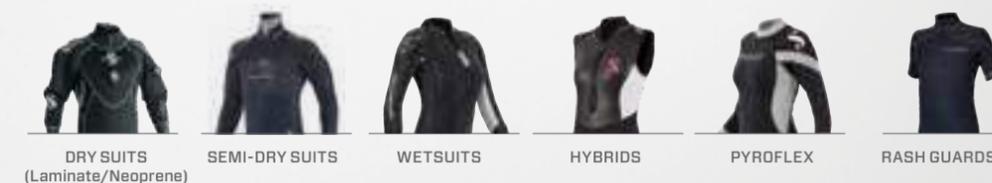

ANTI-ABRASION MATERIAL: Included in all high-stress areas of the suits to ensure lasting quality.

SIZES TAILORED FOR WOMEN: For lasting comfort that feels custom-fit for you.

OTHER WARMTH ESSENTIALS: Spine pads, double collars and zippers with larger flaps, and gussets to block water entry enable our suits to test higher in warmth than other suits on the market.

THE WIDEST SELECTION IN THE INDUSTRY.

Wearing SCUBAPRO is the next best thing to having a custom-made suit. The range of size offerings cannot be matched. What's more, all SCUBAPRO suits lead their categories in comfort, thermal protection and overall quality. So whichever one you choose, you're always diving with the best.

X-Foam: X-Foam is made from limestone neoprene, meaning it's completely petroleum-free and complies with the very strict Polycyclic Aromatic Hydrocarbons (PAH) test requirements. SCUBAPRO was the first to offer this special neoprene blend to better protect divers and our oceans.

Solvent Free Glue: SCUBAPRO is the first in the industry to offer this environmentally and diver friendly adhesive material.

HUMAN FACTOR DIVING™

Layering options

Particularly with the new Pyroflex suit, allowing you to take a suit from tropical to colder conditions

Vast suit sizing

Built for a variety of different body types and shapes

A suit for every dive

From drysuits to semi-drys to a wide range of wetsuits, there is a SCUBAPRO suit for every diver, every dive scenario and every budget

Thoughtful details

Such as I-Safe to keep your computer in place, glove/hood retainers on suit legs, key pockets on suit calves, and more

EVERTEC LT

Lightweight, durable and offering a bit of stretch, this high-quality drysuit is made of heavy-duty Rip-stop fabric and comes with a long list of features to keep you warm, dry and comfortable in all water conditions. Included: suspenders, hood, LP hose and a bag for storage or transport.

EXTENDER new

Built to last, the Extender is constructed of a high quality and extremely durable trilaminate material to withstand the rigors of years of aggressive diving. Though built tough, the suit is lightweight and offers a number of design features that enable you to achieve a comfortable, streamlined fit. Includes hood, inflator hose and storage bag. Includes attached rubber boots.

EVERDRY 4 improved restyled

Enjoy the fit and flexibility of a wetsuit with the thermal properties and watertight seals of a dry suit. The high-density 4mm neoprene resists compression so little to no undergarments are required. Built for extended-wear comfort and convenience, the suit includes a hood, inflator hose and bag for storage or transport.

EXODRY new

Offering a unique approach to dry suit diving, the Exodry fuses 4mm high-density neoprene with latex wrist and neck seals. It's a winning combination, resulting in minimal buoyancy variations, maximum range of motion and an excellent sealing system. Includes attached rubber boots, hood, LP hose and storage bag.

UNDERGARMENTS

CLIMASPHERE

Drysuit undersuit thermal garment with suit and vest sold separately.

SUB TECH 490 new

With high performance 490g hollow fibre insulation.

SUB TECH 100 new

Drysuit undergarment made in 100g hollow fibre material.

CLIMASPHERE

SUB TECH 490 or SUB TECH 100

ACCESSORIES

DRY SUIT BOOT

Rugged yet flexible.

EASY DON

With separate inner glove.

EASYDRY PRO new

Completely waterproof.

DRY GLOVE SET new

For all dry suits with latex cuffs.

NOVA SCOTIA

NOVA SCOTIA 7.5MM

The Nova Scotia 7.5mm semi-dry offers more thermal protection than any suit on the market. It was recently CE certified as a Class A dive suit; this is the highest rating a suit of this type can earn. Built with quality neoprene and incorporating the Pure Design Concept, the Nova Scotia 7.5mm is the ultimate in cold water and multi-dive thermal protection. Includes a T-Zip Master Seal dry zipper and hood.

X-FOAM - ALL SCUBAPRO NEOPRENE IS X-FOAM

- PETROLEUM FREE made from limestone neoprene
- ONLY FORMULA THAT COMPLIES WITH P.A.H. TESTS ensuring fewer pollutants
- LIGHTER WEIGHT for travel and comfort
- GREATER ELASTISITY increases comfort and mobility
- HIGHER INSULATION EFFICIENCY for better heat retention
- VERY DURABLE for years of diving adventures

EVERFLEX

EVERFLEX Improved

These ultra warm and comfortable steamers are built with 100 percent Everflex neoprene and incorporate SCUBAPRO's exclusive Pure Design Concept using fewer panels and seams, allowing maximum stretch for extreme freedom. All 2016 Everflex steamers come with a Diamond Span water-draining inside lining that now features a second lining for improved stretch and cold-water protection. Steamers are also assembled using a new and innovative solvent-free water-based glue, a major step towards a truly green wetsuit.

Available in more sizes for both men and women.
7/5mm, 5/4mm and 3/2mm thicknesses

OUR UNIQUE BLUE DIAMOND SPAN INNER

LINING WITH WATER DRAINING MATERIAL ISN'T JUST EXCEPTIONALLY COMFORTABLE AND QUICK DRYING. IT ENHANCES COLD WATER PROTECTION, KEEPING YOU WARMER, LONGER.

For over 50 years, SCUBAPRO has been committed to protecting the oceans. From manufacturing processes and materials to reusable packaging to sponsoring conservation efforts of our Deep Elite ambassadors, we at SCUBAPRO believe we have a strong responsibility to the very environments we love to explore.

We encourage new and seasoned divers to not just dive in, but to experience, discover and protect the oceans. And we lead by example.

SCUBAPRO was first in diving in 2012 to introduce X-FOAM blend neoprene as part of our ongoing effort to better protect divers and our environment. This year, SCUBAPRO is the first to introduce solvent-free glue in our Everflex steamers. We've tested it for over 400 hours – and we know it is better for you – and better for the environment.

DEFINITION

DEFINITION IR7 // IR5 // 3 new

User-friendly steamer use a 3D cut and special tailoring to fit the body like a glove, provide extra stretch where needed, and enhance warmth and comfort. Available in 6.5mm, 5mm and 3mm thicknesses. Colours vary on suits based on thickness.

Women 5mm // Red

Men 5mm // Black-White

HEAT SHIELD

Warms you up with the Infrared Fleece Technology. Built in at Definition IR7 and IR5.

Men 6.5mm // Blue

Women 6.5mm // Purple

Men 3mm // Yellow

Women 3mm // Pink

Women // Black-Grey

Men // Black-Blue

DEFINITION VEST 6MM

Thermal protective jacket with attached hood.

Women // Purple

Men // Black/White

DEFINITION SHORTY 2.5MM new

Great for layering and tropical conditions.

HYBRID

HYBRID 6MM VEST

This versatile vest is designed to look great with all our suit families. Removable hood with durable zipper.

HYBRID SHORTY 2MM new

Make a fashion statement in and out of the water with this sleeveless, beautiful design. This unique one-piece suit is perfect for warm-water snorkelling or other water sports.

PROFILE 2.5MM SHORTY

These shorties will be your steady companion for all your diving and snorkelling activities. Elegantly cut and styled, built in durable and fast-drying nylon, two-sided X-Foam neoprene, Profile shorties provide maximum comfort at all levels.

PYROFLEX

new

Featuring water-repellant, high-stretch 1.5mm water-repellent Everflex neoprene on the outside and high-tech fleece and plush on the inside, this revolutionary design delivers the ultimate in comfort, stretch and thermal protection.

Leave it to SCUBAPRO to deliver unparalleled advantages in one versatile suit. Available as tops or as a 1.5mm steamer, Pyroflex is perfect for diving, snorkelling, or pool training. Use as a layering option to stay warmer longer and get more out of your other SCUBAPRO suits.

The Comfort You Need. The Details You Want.

Thanks to **Body Mapping**, the Pyroflex cut, fit and panels are perfectly matched to ensure the ultimate in stretch and thermal protection.

Thumb loops and stirrups ensure secure fit that won't ride up. The slightly higher-cut neck delivers maximum comfort and protection from BC chafing.

Plush and Fleece Inside

Optimise comfort, reduce water flow, and enhance warmth with a combination of strategically placed materials that dry quickly.

100% Everflex Neoprene Outside

Made with X-Foam, this durable, quick-drying neoprene keeps you comfortable with highly efficient insulation performance and maximum stretch. It's also the only neoprene formula that complies with strict PAH test requirements.

A premium YKK zipper makes donning and doffing easy, and thumb loops and heel stirrups prevent ride-up.

PYROFLEX TOP LONG SLEEVES

new

Featuring water-repellant, high-stretch 1.5mm water-repellent Everflex neoprene on the outside and high-tech fleece and plush on the inside, this revolutionary design delivers the ultimate in comfort, stretch and thermal protection.

ELEMENT 5 // 3 LADY

new

This steamer is uniquely designed for ladies and offers excellent mobility in warm and temperate waters. Made of soft neoprene and ultrasretch, with comfortable glideskin neoprene seals. 5mm and 3mm thickness.

ZIPPERS

All our long zippers are diagonal to reduce seam stress points and make it easier to open and close on your own.

RASH GUARDS

T-FLEX

Look sharp while enjoying outstanding protection. Made from water-repellant Flex-Tec, this rashie dries quickly. Short or long sleeve. UPF-80.

Mens // Long Black

Mens // Black

Womens // Black

Womens // Blue

AMBER new

LADY SLEEVELESS new

UV STANDARD 801

All rash guards are made out of technically advanced materials and tested to EU UV-Standard 801. This new European UV-Standard was introduced as the earlier Australian SPF50+ standard was considered inadequate. The new procedure involves testing not only the new product but also the material under real life conditions such as when wet, stretched and used.

GO BIG new

BLUE PLANET new

CIRCLE new

LOOSE FIT UPF 50

Quick drying fabric, UPF - 50.

EVERFLEX SKIN SUIT

This comfortable suit offers excellent UV protection for tropical diving and snorkelling, and is an effective under layer when worn with a wetsuit.

DIVE WEAR

EVERFLEX HOODED VEST 2.5MM

This classic hooded underlayer is now in 100% Everflex neoprene for super comfortable stretch. Light graphic print on side panels modernises look.

HYBRID CARGO 1MM

Unique cargo shorts with two large pockets, reinforced seat, and designed to be worn over all types of suits. Constructed in 1mm durable neoprene with drawstring waist.

NEOPRENE BEANIE 2MM

new

Neoprene hat for a snug fit and perfect topside warmth.

HEAD BAND EAR PROTECT

new

Super stretch and comfy head band protects ears from coldness before, after or even during the dive.

BOOTS

HEAVY-DUTY 6.5MM new
Form-fitting top.

EVERFLEX 5MM new
Easy donning and doffing.

DELTA BOOT 6.5MM improved
Comfort and protection.

DELTA 5MM improved
Comfort and protection.

DELTA SHORT 3MM
Low-cut and lightweight.

NO ZIP BOOTS new
Velcro closure easy-in boots.

DECK SOLE
Ideal on boats, the sole is slip resistant and will not stain.

SOCKS

CLIMASPHERE SOCKS
Breathable 4-way stretch fleece material.

COMFORT SOCKS 3MM improved
In addition to your dive boot, with anti slip sole.

SUB SOX new
Dry suit under socks in 3 layers.

KAILUA new
Breathable walker for beach and boat.

GLOVES

EVERFLEX GAUNTLET 5MM new
Extra-long cuff.

EVERFLEX 5MM improved
Excellent finger dexterity.

GRIP 5MM new
Improved with diamond span.

G-FLEX 5MM new
Semi-dry design.

EVERFLEX 3MM
Excellent finger dexterity.

ULTRA TITAN 3MM new
Ultra Stretch, extreme comfort.

HYPERFLEX 3MM
Wrap-around wrist closure.

SEAMLESS 1.5MM
Tactile hand-warmer.

TROPIC 1.5MM
Backed with neoprene.

D-FLEX 2MM new
Ideal for tropical diving.

HOODS

EVERFLEX HOOD improved
3/2mm and 5/3mm without bib.

EVERFLEX BIBBED HOOD improved
6/5mm with extended bib.

SEALED HOOD new
6/4mm with slick face and neck seal.

PRO EAR SEAL HOOD new
5/2.5mm with double layers for a watertight seal despite the ear covers and equalisation tubes.

A NATURAL EXTENSION OF YOU.

Your fins, mask, and snorkel should feel custom-engineered for you. That's why SCUBAPRO has created a wide selection of each, reinforced with top-quality materials for ultimate performance. It's the perfect fit for those who want to go further, see more and lose themselves in the experience.

SEAWING NOVA GORILLA Improved

A slightly stiffer blade results in increased power and control for divers who prefer more feedback in their kicks with improved grip. It also allows for more effective sculling and reverse kicking, making the Gorilla an excellent choice for tech divers and dive instructors.

SEAWING NOVA Improved new colours

BOTH PERFORMANCE AND GRIP ON SLIPPERY SURFACES HAVE BEEN IMPROVED. Improved Grip, new extended power plate [1], soft, co-molded Thermo Plastic Vulcanizate (TPV) heel pad [2] and mid-sole pad [3] with rough surface finish for optimal grip. TPV is highly tear resistant and durable. The contrasting grip colour gives them a modern, refreshed look. The multiple-award-winning Seawing Nova delivers the power, acceleration and maneuverability of a blade fin, with the kicking comfort, speed and efficiency of a split fin. You'll be hard-pressed to find a fin more comfortable to wear or fun to kick.

 **reddot design award**
winner 2011

JET FIN

SCUBAPRO Jet Fins have a long and celebrated history of performance. They set the standard for power and durability in 1965 and continue to be immensely popular today. With spring strap.

TWIN JET

You won't find a better provider of maximum propulsion with minimum kicking effort than the Twin Jet. This fin is just fun.

TWIN JET MAX

This high performance fin features a slightly stiffer blade for split fin divers who like more feedback in their kicks.

SPLIT FIN XP new

The famous nature wing technology. With 3 different materials for even higher efficiency and great optical characteristic. Enjoy the extremely comfortable foot piece and the power plate for optimum power transmission. Inclusive bungee straps.

SPRING STRAPS

Bungee straps or steel spring straps available for most Scubapro fins.

JET SPORT FULLFOOT // ADJUSTABLE

The Jet Sport generates propulsive kicking power with excellent stability. It's easy to maneuver too, delivering the perfect blend of performance, comfort and price.

WAKE new

Offering dual-material construction and a traditional blade, this fin is lightweight, comfortable and perfect for travel.

FLUIDA 2 new

Timeless classic design full foot fin. Excellent thrust due to the streamlined shape.

SNORKEL PLUS new

Open heel snorkelling fin, made to fit the bare foot perfectly but also suitable for neoprene boots.

SPECTRA

A metallic look frame, dual lens mask. Exclusive paint process gives your mask the look of stylish eyewear. With optional optical lenses in: -1.5 to -4.5.

Ultra Clear

SPECTRA MINI

The Spectra Mini resembles the metallic-look frame, twin lens Spectra mask, but is smaller in size.

Ultra Clear

SYNERGY TWIN TRUFIT

Original design features one skirt with two thicknesses of silicone. The skirt is thicker near the frame and thinner near the face for great fit, seal and comfort.

Ultra Clear

SYNERGY2 TRUFIT

New generation design features two separate silicone skirts. The main skirt is thin and soft to provide the best possible fit, seal and comfort. The outer skirt is thick to provide support and rigidity near the mask frame.

Ultra Clear

TRUFIT TECHNOLOGY — FEELS LIKE NOTHING. FITS LIKE NOTHING ELSE.

SCUBAPRO's revolutionary Trufit mask skirt technology, benefiting from three generations of design and development, forms a watertight seal on virtually any face, allowing divers to have a secure mask without sacrificing comfort. Trufit Technology mask skirts are designed with the highest quality silicone and are identifiable by their unique ribbing texture.

ULTRA CLEAR LENSES

Ultra Clear SCUBAPRO Ultra Clear lenses have no green tint and offer exceptional clarity underwater.

CRYSTAL VU

A single lens mask with seamless side windows for a panoramic field of vision.

DEVIL new

Frameless mask offering excellent field of vision and a super-soft silicone skirt. The design of the nose pocket makes it easy to equalise. With very low volume. Opaque silicone prevents light reflections.

FRAMELESS new colour

Diving's original frameless mask features a distinctive rectangular shape for excellent field of view. The skirt's soft double-edge seal keeps water out and feels good against the skin. Gorilla features a larger lens and skirt.

Colours: Frameless: black, white. Gorilla: black.

TRINIDAD 2

Unique system of assembling lens and skirt without any frame, with extremely low volume.

GHOST/SPRITE new

Enjoy the single lens mask with low volume and extra soft silicone. It offers a superb field of vision and a great fit. With EZ mask strap for central adjustment and an additional standard mask strap. The Sprite is the smaller version in black and white.

SOLO

Enjoy the view in a streamlined, low-volume frameless mask. Double-sealed silicone skirt molds to the face for a comfortable, watertight seal.

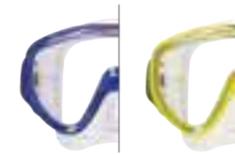

ECCO new

The perfect mask for snorkelling. A two lens mask with low volume, liquid silicone and an universal fit.

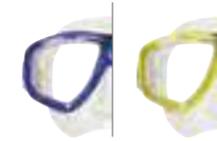

FLUX new

The low-volume single-lens mask offers a strong, impact-resistant polycarbonate frame and a hypoallergenic silicone skirt features a double-feathered edge. With non-slip strap and easy adjust buckles.

FLUX TWIN new

Same features like the Flux, but double lens design and available with optional optical lenses in: -1 to -8.

VIBE

Same features like the Vibe 2, but single lens design. Enjoy 30% increased vision and the high quality liquid silicone.

VIBE 2 new

Double lens mask with increased field of vision/Includes EZ-Mask strap for central adjustment and an additional standard mask strap.

ZOOM new

Made of a soft clear silicone with a very small dead space and a superb comfortable fit. Easily retrofit with optical glasses in: -1.5 to -8 & +1.5 to +4.

CURRENTS COMBO PRO

Clear silicone skirt with twin lens and vented flex snorkel with splash guard make this an universal set for diving and snorkelling. Available in blue and yellow.

PANTAI COMBO SET new

Performance mask and snorkel set with a low volume performance mask. Includes the valve snorkel Vent 2. Packaged in an handy net bag.

SPECIAL MASKS

PRO EAR 2000 new

Offering a sensational concept for ear protection while diving, the ProEar mask comes with ear cups to keep your ears dry while at the same time allowing for easy equalising during descents.

FUTURA 1

A SCUBAPRO classic, the smallest volume mask out there.

FULL-FACE MASK

The Full-Face Mask is a professional-quality mask designed for safety and convenience while diving. Its reduced weight makes it very comfortable to wear. It is widely used by military and commercial divers worldwide.

MASK ACCESSORIES

NEOPRENE MASK STRAPS new

No more tangled hair and twisted headbands.

GO PRO MASK MOUNT

Lightweight GoPro mask mount fits virtually every double lens mask on the market and is easy to attach and remove.

OPTX 20/20 PLUS LENSES

Stick-On magnifying lenses. Makes it easy to read your underwater gauges, just add water and they stick.

SPECTRA DRY

Large-bore tube allows plenty of airflow. Dry top closes when submerged so no clearing is needed upon resurfacing.

SPECTRA

A large-bore tube with a semi-dry top design to keep water from entering the tube. Available in various metallic colours. Coordinated with the SPECTRA mask it features an efficient purge valve and a regulator style mouthpiece for added comfort.

FUSION DRY

A very modern and comfortable dry snorkel with a handy flexible drop away construction in flexible silicone. With water drain valve and effective splash guard.

FUSION PRO new

Modern design features a splashguard top and a lower flex hose. The comfortable silicone mouthpiece is interchangeable.

ESCAPE

A large-bore snorkel with a semi-dry top design to keep water from entering the tube. Includes an efficient purge valve, a regulator-style mouthpiece for added comfort, and a quick-release removable clip.

NEXUS

Three-dimensional barrel for less drag when snorkelling and angled purge valve to divert bubbles out of sight. An ergonomic mouthpiece for added comfort. The extremely flexible barrel allows you to fold and store in your BCD.

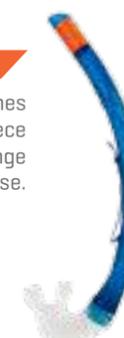

SWIFT new

A pre-formed oval tube with flexible bend and a purge valve for good comfort. With exchangeable silicone mouthpiece.

FUN 2 new

This standard snorkel comes with a silicone mouthpiece and a high-visibility orange top. Durable and easy to use.

VENT 2 new

Basic solid barrel snorkel with a silicone mouthpiece and purge valve.

BUILT FOR THE ADVENTURE.

SCUBAPRO is your trusted travel partner, in and out of the water. Complete your experience with bags that go the distance, knives that give you an edge, and LED lights that truly shine. Every piece is built to withstand baggage claim, the beach, and any other adventure you can pack in.

BAGS

DIVE 'N ROLL new

Designed to securely transport all your primary diving gear, this large wheeler has a virtually indestructible hard-shell case, corrosion-resistant zippers and a removable backpack.

Dimensions: 28x18x17in/72x46x44cm.
Weight: 17.2lbs/7800g. Volume: 32.1gal/146L.

CABIN BAG improved

This semi-rigid roller bag conforms to IATA airline regulations, making it the perfect carry-on. Includes a telescopic tow handle and reinforced wheels.

Dimensions: 22x13.5x8.5in/55x34x22cm.
Weight: 3.9lbs/2250g. Volume: 9gal/41L.

XP PACK DUO new

Huge main compartment includes two mesh pockets for smaller items, plus a zippered front-cover sleeve provides quick-access stowage. Telescopic tow handle and durable wheels allow for near-effortless rolling.

Dimensions: 31.5x19.3x16.9in/80x49x43cm.
Weight: 10.0lbs/4550g. Volume: 37.1gal/164L.

DRY BAG 120 & 50 improved

These versatile dry duffles are made of heavy-duty PVC (Tarpaulin) fabric, with large main compartments offering substantial stowage capacity. Included: carry straps that convert into a backpack system.

120L

Dimensions: 33.5x15.8x13.8in/85x40x35cm.
Weight: 5.7lb/2600g.
Volume: 26.2gal/119L.

50L new

Dimensions: 27.5x11.9x9.9in/70x30x25cm.
Weight: 3.7lb/1700g.
Volume: 11.6gal/53L.

improved PORTER BAG

A foldable wheeler with extra-large volume for all your gear. Includes integrated wheels, backpack system, corrosion-resistant U-shaped zipper, two front and two inside pockets and a reinforced bottom. The bag folds in on itself for easy storage.

Dimensions: 33.5x21.6x13.8in/85x55x35cm.
Weight: 5.6lbs/2550g. Volume: 36gal/164L.
Folded dimensions: 20x16x7in/51x41x18cm.

ECCO ROLLING new

Back pack system if you need to walk and carry your bag. Top end & side smooth handles for easy carrying.

Dimensions: 32x20x10.2in/80x45x26cm.
Weight: 6.7lbs/3050g. Volume: 20.9gal/95L.

DUFFLE BAG new

This heavy-duty traditional duffle-style bag is built tough. While weighing only two pounds empty, it provides enough volume to accommodate a full set of dive gear. It is also easy to load and unload thanks to its U-shaped double slider zipper.

Dimensions: 31.5x15.8x13.8in/80x40x35cm.
Weight: 2.0lbs/900g. Volume: 24.6gal/112L.

BOAT MESH BAG new

Made of PVC coated mesh, this sturdy bag is roomy enough for a full set of gear, yet is lightweight and folds easily for storage.

Dimensions: 27.6x15.8x11.8in/70x40x30cm.
Weight: 1.1lbs/450g. Volume: 18.5gal/84L.

MESH BAG COATED improved

This popular duffle-style dive bag is made of durable coated nylon mesh that lets water drain easily. It is an ideal gear-hauler for live-aboard use or for carrying dive suits separately.

Dimensions: 27x13.5in/69x35cm [diameter].
Weight: 1.5lbs/650g.

CITY BAG improved

An elegant, padded backpack, now with a new PU lining to withstand years of use. Perfect for laptops up to 15 inches. Included are several dedicated pockets and compartments for personal electronics and documents.

Dimensions: 13x7x17in/32x19.7x44cm.
Weight: 2.3lbs/1050g. Volume: 6.2gal/28L.

MESH SACK improved

This lightweight nylon mesh backpack is the perfect carryall for snorkelling gear or tropical dive gear. Durable soft mesh material holds a lot cargo.

Dimensions: 26x15.4in/66x39cm [diameter].
Weight: 1.1lbs/500g. Volume: 17.6gal/80L.

REGULATOR INCL. INSTRUMENT BAG new

Regulator Bag dimensions: 13.8x10.2x4.0in/35x26x10cm.
Weight: 0,7lb/350g. Volume: 2gal/9L.
Instrument Bag dimensions: 4.5x3x6in/11.5x7x15cm.
Weight: 0,2lb/100g. Volume: 0,2gal/1L.

TRAVEL REG BAG VINTAGE new

Dimensions: 12.6x12.6x4in/32x32x10cm.
Weight: 1.7lb/800g. Volume: 2.2gal/10L.

BEACH BAG new

Designed for a complete snorkel set with extra compartments for keys and wallet. Top handle and shoulder strap provide convenient carrying.

Dimensions: 26.4x10.6x6.7in/67x27x17cm.
Weight: 0,8lbs/350g. Volume: 6.2gal/28L.

MAXI & MINI DRY BAG new

Ideal carrier to transport and protect your belongings from water, sand and dust with roll-and-close system. Made of 500D heavy-duty Tarpaulin and heat sealed construction and with a comfortable padded backpack.

MAXI: Dimensions: 19.5x11.8x7.8in/50x30x20cm.
Weight: 2.1lbs/950g. Volume: 6.5gal/30L.

MINI: Dimensions: 15.8x9.8x3.7in/40x25x9.5cm.
Weight: 1.8lbs/800g. Volume: 2.2gal/10L.

TRAVEL KIT new

Dimensions: 10x5.3x4in/25x14x10cm.
Weight: 0.4lbs/200g. Volume: 0.8gal/4L.

TABLET BAG

Take your electronic tablet with you everywhere you go with complete confidence.

Dimensions: 10.3x7.9x0.9in/26x20x2cm.
Weight: 0.5lbs/240g. Volume: 0.2gal/1L.

MFS BAG

Handy bag made of nylon mesh for mask and snorkel [small] or mask, snorkel and fins [large].

SPLASH PROTECTOR new

Splash proof – for your phone.

KNIVES

K6 new

15.5cm stainless steel blade offers smooth and serrated edges plus line-cutting notch. Includes injected molded sheath.

K5

A classic 11cm stainless steel blade.

SK75 TITANIUM new

Made of lightweight, corrosion-free titanium, this compact knife features a 7,5cm blade and an easy-grip handle with an eye to attach a security lanyard. It's the perfect cutting tool for attaching to a BC.

SK "T" TITANIUM new

Titanium knife with patented sheath mechanism and exclusive design.

WHITE TIP

Excellent 6.4cm cutting edge. Stainless steel blade resists surface oxidation. Includes locking sheath and BCD kit.

new **SK21**

A comfortable knife with a well formed grip with SoftTouch inlay and a 12cm blade.

MAKO

Compact dive knife offered in stainless steel or titanium. With 8.5cm blade.

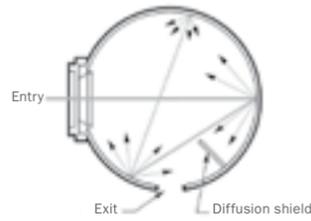

X-CUT TECH KNIFE

Titanium blade retains sharp serrated and smooth cutting edges for corrosion-free performance. Sheath fits tech harness waistbands.

LIGHTS

LED lights are the dive lights of choice among today's divers, and none compare to SCUBAPRO's Novalights. Light years ahead in dive light design, Novalights are equipped with high-intensity LEDs that far outpace the competition in brilliant lumen illumination, they are machined from heavy-duty aluminum, making them both lightweight and built to last and they offer multiple power modes and safety features that rank best in class. Nothing lights up a dive like a Novalight.

All SCUBAPRO lights are measured in an integrating sphere and offer real lumens.

DIVER'S BEST VALUE

NOVALIGHT 720/720R new

Newest Cree XPL LED. 100% or 50% power modes. Choose from full-sized 720 (22.2cm long, 3 C cells), or compact 720R (14cm long, rechargeable Li-ion). Batteries sold separately. 720 lumen illumination ranks among the best in its class.

NOVALIGHT 720 WIDE/720R WIDE new

Same 720 lumen illumination and features, with Cree XML U2 LED and wider 80-degree beam. Batteries sold separately.

NOVALIGHT 220 new

Just 9cm long, it can be stored in the smallest BCD pocket. Three power modes: 100%, 50% and Flash. Output of 220 lumen. Powered by CR123 batteries (not included).

NOVALIGHT 200

Compact, lightweight aluminum LED light with rated output of 200 lumens. Up to 3.5 hours of high intensity light with 3 AAA alkaline batteries.

CONVERSION & CHARGER KITS

Also available: The Kit includes the complete tube and manual. Just replace the tube and you can choose between 3x C batteries (NOVA 720) or 1 x 18650 battery (NOVA 720R).

ACCESSORIES

SAFETY & FUN new

Combination safety, ideal for snorkellers.

SAFETY BUOYS new

new

LIFT BAG

TECH LINE Lift bags, high frequency welded, no-return valve, also suitable as a large marker buoy. 25kg and 50kg lift.

MARKER BUOY new

With Alpha flag.

ACOUSTIC & LIGHTNING SIGNAL DEVICES

DIVE ALERT PLUS new

Under water and surface emergency device.

SHAKER new

With magnet.

FLASHY LED new

Mini LED flash light with replaceable batteries.

GEAR MARKER **new**

This is a must have for every diver and snorkeller. The diver can mark his personal equipment with the marker pens to avoid confusion at the dive site. Gear marker is available in neon yellow, white, silver, neon orange and fluorescent.

FIND YOUR FREEDOM.

Leave your tank behind and slip into the ocean with the freedom to explore. With innovation and performance at the forefront, SCUBAPRO's debut freediving line was created with world-class freedivers. Every fin, mask, snorkel and wetsuit was designed to make the most of your single breath.

FREEDIVING

SCUBAPRO's impressive line-up of freediving gear is like no other. Created in collaboration with some of the world's best freedivers, SCUBAPRO lives up to its premium reputation by delivering sleek hydrodynamic designs, high tech materials and expert craftsmanship. No matter what kind of freediving interests you, our gear line is engineered to take you there... faster, deeper and longer.

ELEMENT 1 FREEDIVING STEAMER new

Recreational 1 piece steamer with 5/4mm soft neoprene. The "sharkskin" textured neoprene is high-stretch and very durable. Smooth-skin neck seal minimises water intrusion and help retain body heat. With comfortable 3D diagonal-cut zipper.

APNEA HOOD new

With bib and seal to fit the Element 1 steamer.

ELEMENT 2 PC FREEDIVING STEAMER new

Two-piece 5/4mm wetsuit features classic high-waist pants and hooded beavertail top without zippers. The "sharkskin" neoprene is durable, high-stretch and virtually eliminates hydro-drag. Designed and constructed in collaboration with the world's foremost freedivers. Thicker neoprene in the torso area increases thermal protection, while thinner neoprene in the arms and legs improves mobility.

TRYGONS

Developed by SCUBAPRO in partnership with the world-record-setting fin manufacturer, Trygons, these new state-of-the-art carbon fins deliver the ultimate in comfort and kicking performance at any skill level.

S1 new

With a 99-percent pure carbon blade this is the most powerful, efficient and lightest freediving fin on the market. Exceptional power recovery and unparalleled performance, the unique design reduces turbulence and drag forces.

S2 new

Built with carbon layers over a fibreglass core, the S2 delivers a kicking performance almost comparable to the S1, at a competitive price.

S3 new

Long, soft blade made of a high performance plastic compound. Generates power and speed while maintaining excellent energy efficiency. Durable and affordable. These fins are a great option for scuba divers too.

MONOFIN new

Constructed out of the same materials as the S2, the soft foot pockets, blade action and double-wide shape generate an exceptionally powerful kicking performance as well as a great comfort.

APNEA MASKS

STEEL PRO new

Frameless, single lens design offers an expansive, low volume view. Streamlined and lightweight, its soft silicone skirt provides a comfortable, watertight seal. Perfect for freediving or scuba diving.

STEEL COMP new

Ultra-low internal volume makes equalising easy. Mask compresses on descent so equalisation is not required as often. Preferred by deep divers. Not recommended for scuba diving.

STEEL new

Double lens mask with very low volume. With universal fit for freedivers and scuba divers.

APNEA BELTS

STANDARD

MARSEILLE

APNEA SAFETY BUOYS

FREEDIVING SURFACE BUOY COMPLETE new

WITH ALPHA FLAG

BLADDER

FREEDIVING SURFACE BUOY new

APNEA SNORKEL new

Ultra-flexible, removable upper barrel. Folds easily for storage.

NOSE CLIP new

Essential nose clip for worryfree apnea diving.

MONOFIN BAG new

High quality and sturdy bag made of TPE tarpaulin. With shoulder straps for comfortable transport.
Dimensions: 33x33.8x2.3in/84x86x6cm.
Weight: .3.2lbs/1450g.
Volume: 8.6gal/39L.

APNEA BEACH BAG new

Dimensions: 37x10.2x6.3in/94x26x16cm.
Weight: .0.9lbs/400g.
Volume: 8.6gal/39L.

LIFELONG PASSION BEGINS HERE.

Keeping kids comfortable, confident and safe in the water starts with the right gear. SCUBAPRO offers a complete line of snorkelling and diving equipment built around young divers' needs. And for parents, there's no better peace of mind than seeing your children wearing the best name in the business.

KIDS

SCUBAPRO's line of kid's equipment is the same high quality, durability and materials as our adult gear. Designed to address the unique fit and performance needs of children, SCUBAPRO ensures their first underwater experiences are unforgettable.

REBEL 3MM & 6.5MM new

Back-zip steamer delivers warmth, flexibility and a comfy plush interior.

REBEL SHORTY 2MM new

2.5mm kids shorty in a cool, modern design, stretch panels on the sides.

REBEL VEST 5MM new

For added warmth and protection.

REBEL HOOD 5MM new

Protects head and neck. Velcro closures make it simple to put on and take off.

REBEL GLOVES 3MM new

Super stretch, plush neoprene, large gusseted Velcro® flap. Easy for kids to open and close.

RASHIE new

Shorts and tops sold separately.

SUPER SOXX new

Children's boots with flexible sole and adjustable top.

SEAHORSE KIDS SHORTY new

Soft 3mm shorty with spandex panels with thermal and UV protection SPF 80. Ideal for beach and warm waters.

REBEL BCD new

Built tough to withstand many dive seasons and multiple growth spurts, a choice of interchangeable cummerbunds and adjustable length shoulder straps ensures the perfect fit as a young diver grows.

CHILD 2 new

Perfectly shaped to fit small faces. Extra soft non-allergic silicone skirt and Ultra Clear lenses.

MINI VU new

Top mask for kids, juniors and those with smaller faces. With extra soft non-allergic liquid silicone.

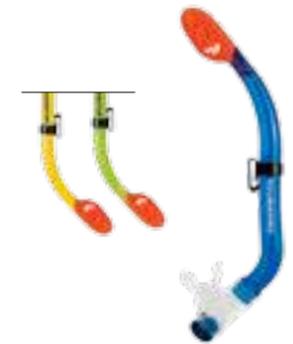

SPIDER SET new

This high-quality children's snorkelling set comes with a single lens mask complete with soft silicone skirt, and a comfortable snorkel with splashguard and lower purge valve.

CHILD 2 new

Kid-sized snorkel with silicone mouthpiece and high visibility splashguard to keep water out.

MINI DRY new

Dry snorkel for perfect water fun. Soft, non allergic silicone mouthpiece with purge valve.

MK2 EVO / R095 new

The perfect regulator for your young diver. The MK2 EVO/ R095 is lightweight and easy breathing. With shorter hose and smaller mouthpiece. Invest in a regulator that will grow with your young diver.

SNORKEL PLUS new

Open heel snorkelling fin, made to fit the bare foot perfectly but also suitable for neoprene boots. Very easy to put on and take off, and comfortable to wear. Each size fits a wide range of foot sizes.

FLUIDA 2 new

Timeless classic design full foot fin. Excellent thrust due to the stream lined shape.

SCUBAPRO
cares

For over 50 years, SCUBAPRO has been committed to protecting the oceans. From manufacturing processes and materials to reusable packaging to sponsoring conservation efforts, we at SCUBAPRO believe we have a strong responsibility to the very environments we love to explore.

SUSTAINABLE PRODUCTS

We encourage new and seasoned divers to not just dive in, but to experience, discover and protect the oceans. And we lead by example.

SCUBAPRO was first in diving in 2012 to introduce X-Foam blend neoprene as part of our ongoing effort to better protect divers. This year, SCUBAPRO is the first to introduce solvent-free glue. We've tested it for over 400 hours - and we know it is better for you - and better for the environment.

We've got some exciting products launching in upcoming months as well - including the industry's "greenest" or should we say "bluest" wetsuit. Stay tuned!

BUILDING AN OCEAN ETHOS

For over fifty years, we have a long history of supporting efforts of organisations like Sharkproject, SOS Seaturtles, Yaqu Pacha, Mission Blue, Galapagos National Parks, Shark Angels, Conservation International, WWF, Antinea Foundation, San Diego Oceans Foundation, REEF, and the National Marine Life Center, among others.

SCUBAPRO believes in building bridges not walls - and working together to take on the biggest issues facing the oceans, while encouraging every diver to be conservation minded. We are excited to share these efforts with you and encourage you to get involved as well.

REUSABLE PACKAGING

We're taking a deep dive on how we package things - and moving towards reducing our footprint. We believe the best packaging is not just using recycled materials, but rather, is actually reusable so you'll keep it for years to come. For years, we've delivered our products, like Seawing Novas, boots and gloves in reusable bags - which our divers have come to love. Many of our dive computers are also delivered in cases our divers use again and again. We're continuing the focus on this area, from recycled materials to reusable packaging to reduced printing.

REGIONAL EFFORTS & OUR TEAM

At SCUBAPRO, we are avid divers who don't just make the best dive equipment - we use it. And we personally recognize our responsibility to preserve and protect the very thing that our products allow divers to explore - the oceans.

Many of our team members are involved in local efforts to protect the oceans and threatened species. The list of efforts is long and impressive and that starts at the top. Not only did Sylvia Earle sit on our board for many years, our president is on the advisory board of the National Oceanic and Atmospheric Administration (NOAA) Marine Sanctuaries, and our director of marketing founded Shark Angels. The list goes on and on. Our regional offices regularly conduct beach cleanups, donation drives and contribute locally as well.

We also want to get as many people in the water as possible, and contribute to many efforts - from underprivileged kids to war-wounded. We believe the more people who experience diving, the more people who want to advocate for the protection of this planet's largest, and most important, ecosystem.

OUR AMBASSADOR PROGRAM

We are committed to being vigilant and aware of ocean issues now and in the future. Our Deep Elite Ambassadors include such conservation visionaries as Sylvia Earle, WYLAND, Howard and Michele Hall, and Stan Waterman. These individuals have supported SCUBAPRO for decades, and in return SCUBAPRO has supported them.
